Airband are an internet service provider who have been commissioned by local county councils to construct a new **ultrafast fibre network in your area**.

The build is focused on **bringing speeds of up to 900Mbps** to areas where fibre connections are not available, and as such, we are building near you.

In order to keep disruption to a minimum, we aim to use existing Openreach infrastructure wherever possible. However, where there are gaps in their infrastructure we look to install new apparatus to infill to ensure that we can offer a service to as many people as possible, and as such, **we require to install six new poles in this location**.

Town and Country Planning (General Permitted Development) Order 2016 (amended) (England) and The Electric Communications Code (conditions and restrictions) Regulations 2003 (amended).

Proposed installation consisting of six new telegraph poles for the provision of FTTP.

Located at: WESTHAYES, SIDMOUTH ROAD, ROUSDON, DT7 3RD

Project Reference: DFE14.3-WP1944-4

Airband Community Internet plc hereby gives notice that they intend to install a pole(s) pursuant to the Town and Country Planning (General Permitted Development) Order 2016 (amended) (England) and The Electric Communications Code (conditions and restrictions) Regulations 2003 (amended).

Here at Airband we are always happy to discuss the installation of our apparatus to ensure that everyone's voices are heard so please get in contact if you have any queries.
